Clarity Enhanced (F2)

Item Description: One (1) green stone with a client stated weight of 4.46 carats bezel set in a white metal necklace with one (1) near colorless modified triangular rose cut and numerous near colorless round brilliants.  
 Weight: **4.63 grams (gross)**  
 Measurements: **10.20 x 14.71 x 7.32 mm**  
 Comments: Any statement on geographic origin is an expert opinion based on a collection of observations and analytical data. Due to their growth conditions in nature and recovery methods, most emeralds contain surface reaching features. For this reason, clarity enhancement is a common trade practice.
